

Light Particle Solution to the Cosmic Lithium Problem

A. Goudelis *et al*

October 5, 2016

1. What are axions and axionlike particles (ALPs)? **[Nick]**
2. What are dark vectors? **[Tyler]**
3. How do they relate their proposed particle to ALP? **[Rekam]**
4. Why are old stars used to measure ${}^7\text{Li}$? **[Sudhanva]**
5. How do extra neutrons previously proposed as a solution to Li problem disturb the deuterium abundance? **[Matt]**
6. What are the other mechanisms proposed to solve the Li problem?
[Taya]
